Instructions

When you enter a print into a WPS competition it should be mounted for presentation on a board measuring **500mm x 400mm** which is the size set for external photographic competitions. Unless you do not want your photos chosen to represent WPS at Regional or National level you should mount your prints in frames of this dimension.

Each of your mounted prints must have an identifying label permanently fixed to the rear, placed centrally and towards the bottom. The labels above allow you to include the required information in a clear and unambiguous way so competition organisers can clearly see the title of your work and who you are.

To use these forms, modify the details which don't change to include your membership number, name and address then save it as your master document. Then, each time you need forms for a competition, you can load the master and simply alter the date and title as needed. Make sure you centre your title in the frame so it remains easy to read and keeping the text as bold will also help the title to be more easily read in a darkened room.

If you prefer to hand-write your forms that is allowed: simply delete the sample details included, print blanks and write-in your details manually.

The forms do not need to be printed in colour.

If you need advice or help using these forms please contact:
